Chiropractor of the Year Award 2009

Dear Dr. Long:

On behalf of VOCA, it is with great pleasure that we present to you the title and honor of VOCA's 2009 Chiropractor of the Year Award. Congratulations!

The ethical manner in which you worked with us revealed a character and integrity unmatched in the field of chiropractic.

We found you to be fair to chiropractors, provided us with evidence- based opinions and were first and foremost respectful of patients' rights. Your assistance in the wording for the Informed Consent legislation, as well as your testimony, proved most beneficial.

The knowledge you display in all aspects of chiropractic is very impressive. A special mention must be given to your understanding of stroke, spinal manipulation, and subluxations.

We look forward to continuing our work with you to reform and improve chiropractic standards that would greatly benefit not only patients themselves but also the entire profession's status within the healthcare community.

On a personal note, from our discussions, it is apparent that some chiropractors, chiropractic lobbyists and 'whiplash' lawyers are constantly attacking you. Please remember Dr. Long, their main concern is in protecting their pecuniary interests, unlike yourself, whose main concern is in protecting the rights and health of patients. For this, we are so very appreciative and we thank you very much. So, ***keep up the good fight!***

Please accept this award as VOCA's Chiropractor of the Year for 2009!!

Sincerely,

Janet A. Levy
President
